Allow, block or delete cookies

The present website does not require the installation of cookies. The user may not accept them or configure their browser to block them, if necessary, remove them. In the web browser the user can find the necessary security instructions to carry out these actions. Examples:

• If you use Microsoft Internet Explorer, in the menu option Tools> Internet Options> Privacy> Settings.

• If you use Firefox, in the menu option Tools> Options> Privacy> Cookies. • If you use Google Chrome, in the menu option Configuration> Privacy
• If you use Safari, in the menu option Preferences> Security
You can use the "Help" section in the toolbar of most browsers to change the settings of your computer, but some of the features of the services offered on the web may not work or may be more complicated or glasses to access if all cookies are rejected.
Many browsers allow you to activate a private mode by which cookies are always deleted after your visit. Depending on each browser, this private mode can have different names, below you can find a list of the most common browsers and the different names of this "private mode":
• Internet Explorer: InPrivate
• FireFox: Private Browsing
• Google Chrome: Incognito
• Safari: Private Browsing
• Opera: Private Browsing

Please read carefully the help section of your browser to learn more about how to activate "private mode". You can continue to visit our website even if your browser is in "private mode", however, the user experience may not be optimal and some utilities may not work. In the event that a medium or low security configuration is used that allows the automatic installation of cookies when navigating through our website, we will consider that it tacitly consent to its installation.
